

# FloaTEC®

## Breaking Through

**A GROWING AND DYNAMIC COMPANY OFFERING  
COMPETITIVE, PERFORMANCE BASED  
COMPENSATION PACKAGES**

FloaTEC, LLC is a 50:50 joint venture company created by **McDermott** and **Keppel FELS** to market, engineer, design and deliver deepwater floating production systems (FPS). FloaTEC is the only company to design and build a full complement of FPS solutions - spar, semi, and TLP.

FloaTEC's vision is to be the global leader in floating production systems, providing value through its proven and innovative solutions - from concept to delivery!

### **Career Opportunities and Development**

FloaTEC provides the chance to get involved in the leading edge of FPS technology development. Individuals have access to an extensive resource base and tools to enable the development of new ideas in a dynamic and challenging environment.

Based on a healthy backlog of deepwater engineering and delivery projects, and recent contract awards, you can join a company on the move. Career positions include:

- **Director of Execution**
- **Proposal Manager**
- **Planner / Scheduler**
- **Project Engineering Manager**
- **Riser Engineer**
- **Structural Engineer**
- **Technology Development Engineer**
