Subject: Sponsors for the *The 6th Annual KOEA Forum – “New Waves of Technology”*

Dear : Eric Namtvedt(FloaTEC, LLC)

On behalf of KOEA as well as Korean-American engineers associated with energy industry, I would like to express our sincere appreciation to you and your company for your generous contributions towards our program. With your great support, KOEA had tremendous success with the 6th KOEA Forum held on May 8, 2008. This year’s forum, titled “New Waves of Technology,” encompassed 112 engineers and executives from many prominent companies. The three keynote speakers, who are leaders in the energy industry, provided us with new horizons and challenges.

It was a great opportunity for KOEA members to build network, exchange technological advancements, and bolster leadership at the forum. It was also a great pleasure for all of the participants to meet the executives of both Korean and US companies who participated in the forum and have chance to share their experience and knowledge.

I am very pleased that you joined us for the forum, and I hope you experienced the enthusiasm and excitement of the participants who are the current and future leaders in the energy industry.

Finally, I would like to emphasize that your contributions will be a strong foundation that enables KOEA to become a better technical organization nourishing more industry leaders by providing various programs in the future. Without your involvement, these things would not be possible. Thank you again for your generous support to KOEA.

Very truly yours,

Dong S. Kim
Chairperson of KOEA Forum and President of KOEA
